An engineer-turned-product-designer with ~8 years across enterprise systems and on-device AI products, skilled at translating high-density, technically constrained products into tools users can trust. Single-handedly owned an industrial-inspection system redesign and shipped it personally as an engineer; now leads product design for on-device AI and enterprise IT products at ASUS.

Experience

UX Designer • ASUS

2024.06 ~ Present · ~2 yrs | Taipei, Taiwan

- Lead experience and index-behavior design for the on-device AI product **File Search**, making the semantic index govern itself under device memory limits to balance data completeness with device performance
- After the gyroscope feature launched, handled a customer-complaint crisis in the China region — resolving 7 complaints and recovering 4 returns within one month** — coordinating across Customer Service, RD and MKT
- Lead the end-to-end UX of the enterprise IT tool **ACM** from v1.0 to v2.0, translating high-complexity BIOS/driver operations into an interface IT administrators can use directly
- Proposed an AI-assisted UX workflow framework that confirmed a project sitemap in 2 weeks and was adopted by the 10-person design team; established shared UX guidelines across 3 product lines

2023 – 2024 · Career break (family circumstances and health recovery)

Senior Software Engineer • TRI

2017.04 ~ 2023.04 · 6 yrs | Taipei, Taiwan

Official title: AXI System Software R&D Engineer (grade: Senior Engineer) · Sole UI/UX owner of the TR7600 AXI system

- Owned the complete UI/UX redesign of the industrial-inspection system **TR7600 AXI** and shipped it personally, **cutting per-board programming time by 37% (295 → 186 minutes)**, deployed across Tier-1 global EMS manufacturers
- Redesigned the two most time-consuming workflows: Library –39% (124 → 76 min) and Fine Tune –51% (158 → 77 min)
- Built a unified design system and Design Guideline shared across 10 machine models (maintained 6 years), supporting 5 locales for whole-family UX consistency
- Introduced Product Design from scratch in an engineering-led firm; designed a "Customer → FAE → RD" requirement process adopted by 50+ FAE/RD staff; served as internal UX instructor

Education

National Taipei University of Technology M.S. / Interaction Design • 2014 – 2016

Foundation of design capability; thesis: AR rehabilitation game (C# / Unity3D)

Shih Hsin University B.S. / Information Management (Information Technology) • 2010 – 2014

Foundation of programming capability; coursework in software development, databases, systems analysis

Skills

- Product Design
- UX Strategy
- Information Architecture
- Design System
- End-to-end Product Ownership (0 → 1)
- Systems & Platform UX
- On-device AI Product UX
- Enterprise B2B SaaS
- Security UX
- Usability Research (qual + quant)
- Trade-off Analysis
- Cross-functional Collaboration
- Figma
- FigJam
- AxureRP
